I bought a car in March which included XM Radio. The one station I have come to rely on is the Instant Traffic and Weather station for Baltimore as I travel 40 miles one way to work using 3 interstates. Before getting XM Radio, I would listen to the local AM and FM stations for traffic info to decide which route to take to and from work. It was very frustrating to "catch" the traffic report at the stations' allotted time spots and more than once would miss the report and end up in a traffic jam inching my way to work or home. I have found the XM Radio traffic reports in-depth and up to the minute. Many times when listening to the report on AM or FM the report was vague and not very informative as to exactly where traffic problems existed. Therefore, I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
